ASE-196 Colony Counter ALPHATM

An ideal instrument for counting bacterial mould colonies in culture work, It provides uniform glass free illumination to minimise the strain on eyes and clearly defines even small colonies. A 100mm. dia lens covers the entire illumination field and its magnification assures highly accurate results. Counting plate with standard wolfhugel ruling ensures clearly differentiated and sharply defined colonies. Supplied complete with counting plate, lens, cord and plug. To work on 220V A.C. Supply. **Other changes can be done on request or as per user specification.**

ASE-197 Colony Counter (Digital Electronic Model) ALPHATM

Same as "ALPHA" but the model is fitted with automatic 4 digits LE Digital Display. It minimises the strain of counting. Each touch of Auto Marking Pencil in the petridish increments the colony count by '1' and the flowing LED Digital depicts the total colony count, thus relieving the technician from the tedious task of counting and eliminating the chances of error. Maximum colony Count possible upto 9999. Wolff hue gel glass grid with focusing facility, a count is registered and confirmed by an audio beep, manual count switch for counting without Marker pen. Provided with a manual reset of digital display, ON/OFF Switch, counting plate, lens, cord and plug. To work on 220V A.C. **Other changes can be done on request or as per user specification.**
