**ASE-121 Flocculator (Jar Testing Apparatus) ALPHA<sup>TM</sup>**

Flocculator has been specially designed for use in water treatment plants as Jar Testing Apparatus to estimate the dosing of alum and such other coagulants for treatments of water and sewage. It provides identical test condition for all samples. It is suitable for continuous run in any busy laboratory. Illuminator base consists of general continuous run heavy duty 1/20 HP, variable speed motor from 10 to 100 RPM with built in speed control. Stainless steel stirring paddles. The stirring shaft can be removed without disturbing other stirrers. It is supplied with either two, four or six stirrers working on 220 volts A.C. This unit is supplied without beakers.

**STIRRERS**

CAPACITY 1 Lit.      CAPACITY 2Lit.

- (a) For Two Stirrers
- (b) For Four Stirrers
- (c) For Six Stirrers

**OPTIONAL ACCESSORIES**

- (a) Attachment for feeding dose to all stirring units simultaneously.      1550.00
